

BAM 2025 CONFERENCE

Financial Management Track

Track Chairs:

- Konstantinos Bozos, University of Leeds, UK
- Miriam Marra, University of Reading, UK
- Hossein Jahanshahloo, Cardiff University, UK

The Financial Management track provides a forum for academics and practitioners interested in financial and related professional services along with the impact of finance on management practice and research. It aims to encourage interdisciplinary thinking and collaboration across fields that span corporate finance, management, international business, regulation, decision sciences and economics. It welcomes empirical, methodological, and theoretical research that has a focus on the firm or the manager as the principal unit of analysis. Papers need to have clearly identified managerial or firm governance implications.

For BAM2025, we invite both theoretical and empirical contributions across all areas of finance and financial management, including but not limited to the following topics:

Advances in Methodology	Financial Literacy
Alternative Investors and the Firm	Financial Strategy
Behavioural Finance	Financial and Corporate Risk Management
Blockchain Technologies	Financial Technology (FinTech)
Capital Markets	Household Finance
Capital Structure	Impact Investors
Corporate Finance (Empirics)	Insurance
Corporate Finance (Theory)	Investments
Corporate Governance and Boards	Managerial Finance
Corporate Social Responsibility	Mergers and Acquisitions
Credit Risk and Bankruptcy	Microfinance
Cryptocurrencies	Payment Systems
Derivatives and Structured Products	Private Equity
Entrepreneurial Finance	Project Finance
Environmental Finance	Responsible Investors and the Firm
